

# Estate 'Pet Nat' Riesling Gewürztraminer 2022

---

Summit Club Price: \$30.00

What is Pet Nat?

We started making this wine in 2021 and it was so popular we doubled production in 2022!

It is a style of wine that is popping up in a lot in the 'trendy' bars and bottle shops.

It is loved by natural wine drinkers and fits in perfectly with what we are doing here at Delatite.

The process is simple. We make our normal estate wine and then as we bottle it, we add sugar and yeast. The wine then goes through a secondary fermentation in the bottle that creates the lovely bubbles.

Wine Details

In the last 10 years Delatite has made wine as naturally as possible. We use 100% wild yeast in all Estate wines and have no enzymes or fining agents and minimal Sulphur. Our Red wines are also unfiltered. This allows the wines to fully show the vineyard's characteristics. The grapes are grown following biodynamic principles which doesn't allow the use of artificial inputs; encouraging greater biodiversity in the vineyard.
